Smart sensor soap dispenser

User's manual

Thank you very much for choosing this product. This product adopts infrared sensor, magnetic contact switch, imported controller, combined with the streamlined exquisite appearance, and realizes the humanized use function.

[Application]

Intelligent soap dispenser is suitable for various factories, hotels, restaurants, office buildings, hospitals, banks, schools, exhibitions, stadiums, airports, stations and other places.
Suitable for concealed or recessed installation, very convenient, simple and durable

[Features]

- Flash Lamp
- Equipped with refillable bottles or disposable bag.
- AC battery / DC adaptor (not included but optional)
  If needed, please select the one with adaptor and note which plug you prefer.
- Minimal maintenance modular optimizationstructure.
- Intelligent selection of three preset dosages can be adjusted
- Water tray or floor standing is available.
- Pump available:foam/soap/mist spray

[Technical Parameters]

Smart sensor soap dispenser

| Liquid volume	850ml
Liquid output	0.8-3ml (three preset dosages can be adjusted)
Sensing distance	10 ± 3cm
AC rated voltage	110-220V
AC rated frequency	50Hz

DC voltage	AA1.5Vx4
Adapter input voltage	5V
Size	100x95x215mm
Gross weight	0.88KG
Net weight	0.77KG
